AIRCRAFT REPAIR PLANT 458

LENINGRAD, USSR

Aircraft Repair Plant 458 is located in the northern outskirts of Leningrad, adjacent to the Leningrad/Kolomyagi Airfield. It is a major repair facility in the Leningrad area, for both airframes and engines of military aircraft. The plant occupies an area of approximately 3,000,000 square feet and contains 448,700 square feet of floor space. It is both road and rail served.

25X1D

A comparison of [redacted] photography shows that considerable change has taken place in this plant. One of the large production shops, destroyed during World War II, has been reconstructed. One workshop, 270 x 100 feet, has been removed, and only 8 of 25 original storage buildings are now present. A former section, located west of the main plant across a small stream, appears to be no longer associated with the plant.

The major components of the plant are identified and described on the accompanying line drawing and key to annotations.
